INFORMED OF PROJECT. W ITHIN a few days the question of whether or not sale whether or not Salt Lake City is to have a large fron and steel works will be settled, and at present there is

reason to believe that it will be settled in the affirmative. This, in brief, was the information given last night by J. R. Valentine of the Utah Bedding & Manufacturing company at a meeting of the directors of the Manufacturers & Mer-

directors of the Manufacturers & Merchants' association.

Business policy does not allow Mr. Valentine to disclose the identity of the company or its present holdings and plans, but he assured the directors last night that agents for eastern capitalists are now in Salt Lake. Their purpose here is to investigate fully the question of water, for the mill would require il.000,000 gallons of water per day.

For several days, stated Mr. Valentine, these agents, in company with himself, have been ascertaining the flow of the Jordan river at different points. They were satisfied that a sufficient supply of water was available.

expense they could bore to an ample supply of water.

The directors were given to understand that the proposition was in tangible shape and that they could place credence in the statement that the chances are good for the establishment of the mill in this county. Such a plant would give employment to hundreds of skilled laborers, and, if it is secured, will be the first big feather in the cap of the M. & M. A. At last night's meeting reference was made to the fact that the Colorado Fuel & Iron company had secured sites for mills on the Green river.
